

MANOJ KUMAR

Node.js Backend Developer

ms859483@gmail.com | +91 8534930580 | Noida, Uttar Pradesh 201301 | [linkedin.com/in/manojkumar0580](https://www.linkedin.com/in/manojkumar0580) | github.com/manojkumar0580

PROFESSIONAL SUMMARY

Node.js Backend Developer with 2.8+ years of experience designing, building, testing, and optimizing scalable backend applications and RESTful APIs using Node.js, Express.js, MongoDB, and JavaScript. Experienced in JWT authentication, role-based access control, payment integrations, real-time communication, database optimization, and CI/CD pipelines. Skilled in writing unit and integration tests using Jest and Supertest, maintaining 90%+ test coverage across backend services. Contributed to production healthcare web and mobile applications serving 1,000+ users, including AI-powered workflows using Sarvam AI and Google Gemini. Proven ability to enhance API performance, security, reliability, and code quality through measurable engineering outcomes.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript

Backend Development: Node.js, Express.js, RESTful API Design and Development, Backend Architecture, Webhooks

Databases: MongoDB, Mongoose, Data Modeling, Aggregation Pipelines, Database Indexing, Query Optimization

Authentication & Security: JWT, Role-Based Access Control (RBAC), OTP Authentication, OTPLESS, MPIN, API Security, Signature Validation

Testing & Code Quality: Jest, Supertest, Unit Testing, Integration Testing, SonarQube

Payment Integrations: Razorpay, Stripe, Payment Verification, Webhook Processing

Real-Time Communication: Socket.IO, Twilio, Click-to-Call Integration

AI Integrations: Sarvam AI, Google Gemini API

Cloud & Storage: Azure Blob Storage, AWS S3

Third-Party Integrations: Onfido Identity Verification

DevOps & Development Tools: Git, GitHub, CI/CD Pipelines, Postman

Methodologies: Agile, Scrum, Code Review

Frontend & Mobile: HTML, CSS, Next.js, React Native; familiarity with React.js

WORK EXPERIENCE

AWWALTECH PVT. LTD. - Noida, India

Node.js Backend Developer | Jun 2024 - Present

- Engineer and maintain 10+ backend modules using Node.js, Express.js, and MongoDB, reducing data-retrieval time by 30% through query optimization and database indexing.
- Build and optimize 50+ REST API endpoints using response compression, caching, and database connection pooling, reducing average API response time by 20%.
- Secure 15+ REST API endpoints with JWT authentication and RBAC for three user roles: Admin, Doctor, and Patient.
- Integrate Razorpay, Stripe, Twilio, OTPLESS, and Socket.IO to support payment processing, authentication, and real-time communication for applications serving 1,000+ users.
- Maintain 90%+ test coverage across key backend modules by writing unit and integration tests with Jest and Supertest.
- Design MongoDB schemas, aggregation pipelines, and REST API contracts, reducing data redundancy by 20% and boosting query performance.
- Migrate media workflows to Azure Blob Storage, reducing file-upload failures by 25% and increasing production reliability.
- Build backend APIs for the Doctar AI mobile application and connect two AI platforms, Sarvam AI and Google Gemini, to support intelligent patient conversations.
- Coordinate a five-member cross-functional team through two-week Agile sprints, delivering four major milestones 15% ahead of schedule.
- Strengthen deployment and release quality through CI/CD pipelines, GitHub-based code reviews, and SonarQube analysis, supporting 99%+ application uptime.

PROJECTS

DOCTAR - Healthcare Platform | Live: <https://doctar.in>

Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT, RBAC, Razorpay, OTPLESS, Socket.IO, Twilio.

- Delivered scalable REST APIs for a healthcare platform serving 1,000+ users.
- Built backend workflows for authentication, appointments, payments, and doctor-patient communication.
- Integrated three external services: Razorpay, OTPLESS, and Twilio Click-to-Call.
- Secured 15+ API endpoints using JWT authentication and role-based access control (RBAC).

DOCTAR AI - Healthcare Mobile Application

Technologies: Node.js, Express.js, MongoDB, JWT, MPIN, Socket.IO, Sarvam AI, Google Gemini API, Razorpay.

- Created APIs for five areas: patients, doctors, authentication, payments, and mobile workflows.
- Connected Sarvam AI and Google Gemini to support intelligent patient conversations.
- Established OTP verification, JWT, and four-digit MPIN authentication.
- Enabled real-time doctor-patient communication and conversation workflows using Socket.IO.

JOBROOMS - Backend System | UK Client Project | In Progress

Technologies: Node.js, Express.js, MongoDB, JWT, RBAC, Stripe, Twilio, Onfido, Socket.IO, Azure Blob Storage, Jest, Supertest.

- Delivered 30+ REST APIs for user management, communication, payments, and identity verification.
- Integrated five third-party services: Stripe, Twilio, Onfido, Socket.IO, and Azure Blob Storage.
- Enforced JWT authentication and RBAC across multi-role API access.
- Attained 90%+ test coverage by writing unit and integration tests with Jest and Supertest.

SIXAPP - Backend API Development | Live: <https://six.ind.in>

Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT, Postman.

- Engineered 20+ REST APIs for authentication, profile management, and application data processing.
- Accelerated query response time by 25% through database indexing and optimized aggregation pipelines.
- Structured MongoDB schemas and applied Mongoose validation across application data workflows.
- Collaborated with frontend developers to complete API integration ahead of schedule.

ADDITIONAL PROJECTS

JOB PORTAL - Recruitment Platform

Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT, RBAC, Socket.IO

- Created a recruitment platform for Admin, Employer, and Candidate roles.
- Built APIs for job posting, applications, profile management, and application-status tracking.
- Secured 25+ API endpoints using JWT authentication and RBAC.

FASTag REST SERVICES - Toll and Account Management System

Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT, RBAC.

- Built 15+ REST APIs for toll transactions, account operations, and transaction history.
- Enforced JWT authentication, RBAC, request validation, and secure access controls.
- Designed MongoDB schemas to maintain transaction consistency and financial-data integrity.

EDUCATION

- Master of Computer Applications (MCA): IFTM University, Moradabad | Jul 2024
- Bachelor of Science (B.Sc.): Mahatma Jyotiba Phule Rohilkhand University (MJPRU), Bareilly | Jun 2019

CERTIFICATIONS

- JavaScript (ES6+): EdYoda | 2023 - Asynchronous Programming, REST API Integration, and Modern ES6 Features

LANGUAGES

- English (Professional Working Proficiency) | Hindi (Native Proficiency)
